

RHINOMED TO DISTRIBUTE MUTE IN TAIWAN

September 14, 2017. Melbourne, Australia.

Australian nasal and respiratory technology company Rhinomed (ASX:RNO) is pleased to announce a distribution agreement with Brojaw Inc., to begin distributing snoring and nasal breathing product Mute into the Taiwanese market.

The non-exclusive agreement will see Brojaw distribute Mute to ear, nose and throat (ENT) clinics, sleep doctors, sleep centres, medical centres and sleep clinics. This will then be followed by distribution into drug stores / pharmacies. An initial purchase order has been received.

This agreement follows Rhinomed's announcement on 6th July 2017 that Mute had received Taiwanese Food and Drug Administration (TFDA) regulatory approval as a class 1 medical device for Mute.

Mute is an over-the-counter product to enable snorers to breathe more easily through their nose and keep their mouth closed during sleep. In turn this reduces vibration in the airways that causes snoring. Mute is designed to fit the natural anatomy of the nose and it is adjustable so you can control the level of dilation and airflow.

About Rhinomed Limited (ASX: RNO)

Rhinomed Limited is a Melbourne based technology firm with a focus on nasal, respiratory and breathing management technologies. The company is seeking to monetise applications of its technology portfolio in the Sport, Sleep, Wellbeing and Drug Delivery markets. For more information go to www.rhinomed.global

About the Mute™

Mute™ is a unique nasal respiratory technology that has been found reduce the volume and frequency of snoring in 75% of users. Mute is easy to use, drug free and fits discreetly inside the nose. Designed to give snoring the silent treatment and made from ultra-soft polymers, Mute gently expands each nostril to increase the volume of air in each breath. By doing so, Mute encourages nasal breathing and reduces the need to open the mouth during sleep, factors critical to a reduction in snoring and better sleep quality.
