

A NEW ERA IN SWAB TECHNOLOGY. Rhinoswab by Rhinomed is a comfortable self-collection nasal swab that provides superior sample collection. The ergonomic design sits comfortably within the nose for maximum sample uptake.

Rhinoswab is built on Rhinomed's nasal technology and product lines that are used by athletes, clinicians and customers from all over the world to solve their breathing, sleep and nasal congestion issues.

Sampling efficacy was shown to be 100% accurate for the diagnosis of SARS-CoV-2 in spiking studies conducted by The Victorian Infectious Diseases Laboratory (VIDRL).

Rhinoswab is FDA & TGA registered with patents pending.

APPLICATIONS

- For collection of pathogens and biological samples from the nose for diagnostic testing
- Designed for existing pathology workflows and collection tubes

DIMENSIONS

- 45.5mm total length
- 7.7mm nasal tip width
- 10.7mm nasal tip height
- 22.2mm handle length
- 21.5mm total width of double loop

QUALITIES

- Medical grade quality
- Dual loop action
- Painless and simple self-administration

Loops ergonomically designed to sit comfortably in each nostril for pain free sampling

Loops break off into standard collection tubes

Double loops anatomically designed to maximise contact area between the swab and the nose to maximise yield

Handle allows for easy and standardised self-administration

REFERENCE NUMBER	PACKAGING
EN-RSWB_01	Rhinoswab single pack including swab, pouch and label
EN-ICRSWB_01-24	Inner box with 50 individually wrapped Rhinoswabs
EN-OCRSWB_01-1200	Outer carton containing 24 inner boxes each with 50 individually wrapped swabs – total 1200 Rhinoswabs
